

The SPE Open Blast range of equipment offers the user a choice of portable abrasive blast cleaning machines combining efficient operation with maximum site safety

The units are hydraulically tested to twice working pressure and are supplied with a test certificate. The package for each machine includes 10m (33') blast hose, control lines, air filter, blast nozzle, helmet, and gloves.

BL 1080
The smallest in our range. This machine is ideal for remedial work, glass etching, and general maintenance. Fitted with our 1/4" (6mm) blast nozzle as standard.

BL 20300
A robust machine for the professional contractor. Provides high output and cleaning rates fitted with 3/8" (9.5mm) blast nozzle as standard.

BL 24650
Designed for maximum output and minimum downtime between refilling and still portable. The largest machine we supply. Fitted with 3/8" (9.5mm) blast nozzle as standard.

BL 14160
Ideal for the small to medium size contractor where mobility is required but capable of high productivity fitted with 5/16" (8mm) blast nozzle as standard.

Specifications				
Type	BL 1080	BL 14160	BL 20300	BL 24650
Capacity	22.7kg (50lbs)	68kg (150lbs)	136kg (300lbs)	272kg (600lbs)
S.W.P.	115psi 8bar	115psi 8bar	115psi 8bar	115psi 8bar
Air Requirement at 100psi	82cfm	137cfm	196cfm	254cfm
Machine Dimensions				
Height	711mm (28")	1016mm (40")	1016mm (40")	1346mm (53")
Diameter	254mm (10")	357mm (14")	508mm (20")	610mm (24")

Features

- Robust construction
- Can be fitted with sand or grit valve
- Portable
- Versatile

Applications

- Blast cleaning concrete and steel structures
- Ship yards
- Construction
- Petrochemical
